BUILD DOCUMENTATION
ZombAI.io · 2025

6-Step Build Log · How This Was Built with AI Prompts

PROMPT-BY-PROMPT BUILD LOG

1 PROMPT 1 — DESIGN ELEMENTS

Defined the visual design system: color palette (Cream, Cocoa, Blush, Gold), UI components, card styles, typography (Playfair Display + Poppins), and homepage layout.

2 PROMPT 2 — BRAND RESEARCH

Fetched live business information about The Cake Rhythm from Google — address, contact, Instagram handle, and brand positioning for grounding the design.

3 PROMPT 3 — SINGLE-PAGE WEBSITE

Generated a complete self-contained HTML/CSS/JS website with Hero, Bestsellers, Custom Cake form, Brownies, Gallery, Testimonials, Cart Drawer, Checkout, and Footer — all mobile-responsive.

4 PROMPT 4 — WHATSAPP INTEGRATION

Extended the order & custom cake forms to redirect the complete order summary to WhatsApp (+91 9884620064) via a wa.me deep link on submission.

5 PROMPT 5 — GOOGLE SHEET + ORDER ID

Added Google Apps Script backend to save every order to a Google Sheet. Generates a unique 6-character Order ID from Customer Name + Mobile + Date, formatted as CR-XXXXXX.

6 PROMPT 6 — ADMIN PANEL

Built a separate mobile-responsive Admin Panel that fetches all orders from the sheet, shows KPI dashboard (Today's Orders, Revenue, Pending, Delivered), supports accordion order view, filters, and live status/payment updates written back to the same sheet row.

TECH STACK

- **HTML / CSS / JS**
  Single-file website, no frameworks
- **Google Apps Script**
  doGet + doPost Web App backend
- **Google Sheets API**
  Order database (read + update)
- **WhatsApp wa.me**
  Instant order notification
- **MediaPipe + Three.js**
  AR dial (separate project layer)
